

Harvard Catalyst Community Participatory Research Program Resources

The *Harvard Catalyst Community Participatory Research Program* offers assistance in planning or conducting the following types of translational research, including assistance with developing preliminary data or proposals for pilot funding through the Harvard Catalyst.

Training in Community-Based Participatory Research (CBPR)

The *Program* can assist investigators by providing:

- Guidance in CBPR methods and techniques and appropriateness
- Connection to potential community partners
- Consultation to those interested in conducting CBPR studies
- Technical assistance and review for CBPR grant applications
- Partnership with investigators on CBPR projects and connecting investigators across Harvard institutions
- Assistance with accessing public health data on Boston Metro communities

Conducting Community-Based Participatory Research

The *Program* offers assistance in areas of CBPR including:

- Research tool design
- CBPR methods
- Formulating analytic plans
- Conducting analysis
- Building community relationships
