

Introduction to Clinical Investigation

REQUEST FOR APPLICATIONS

Course description: The Introduction to Clinical Investigation (ICI) course (*September 11-14, 2017*) provides an overview of the types of clinical translational research, ranging from T1 (first-in human/proof of concept), T2 (definitive clinical trials to change the standard of care), T3 (practice-based), and T4 (population-based), and presents the skills and methods applicable to each translational research area. This introductory course also provides a comparison and contrast of T-domain methodologies, while highlighting those skills that are essential across the translational blocks (i.e., oral and written communication).

Target audience: Those who are currently or plan to be engaged in clinical/translational research. If you are outside of our target audience and interested in attending, please contact us.

Date applications are due for applicants and endorsers: July 14, 2017 (applicants); July 19, 2017 (endorsers)

Date by which applicants will be notified: August 4, 2017

Selection process and criteria: Applicants are required at minimum to have at least an MD, PhD, or equivalent. Applicants must be able to commit to four full days of the course and be endorsed by their immediate supervisor.

Harvard Catalyst's Education Program offers first priority to applicants who are current Harvard students, faculty, or current employees of Harvard University, its ten schools, and its seventeen Academic Healthcare Centers (AHC), or that of Boston College School of Nursing, MIT, or Harvard Pilgrim Health Care. A complete list of participating institutions can be found on the Harvard Catalyst website: <http://catalyst.harvard.edu/about/>.

The next level of priority is awarded to members of the national Clinical Translational Science Award (CTSA) consortium. A complete list of participating institutions (CTSCs) can be found on the CTSA website: <https://www.ctsacentral.org/institutions>

Applicants who are external to the groups listed above are accepted for a fee when space is available.

Tuition/fee for external participants: Please contact us for more information.

The expectation is that by accepting a seat in one of the Education Program courses, the participant is agreeing to attend the entirety of the course. As part of the application process, a supervisor's endorsement for course attendance, granting the applicant permission to be away from the lab or clinical duties for the duration of the course, will be automatically generated. If a participant must be absent for any portion of the course, it is the participant's responsibility to notify course coordinators, since attendance is taken at all sessions. If the participant cannot be reached, the coordinators will then

be obliged to notify the endorsing supervisor of the unexplained absence. Since the Education Program courses are expensive to produce, but are offered to Harvard and CTSC affiliates free-of-charge, including meals and Continuing Medical Education (CME) credits, the only obligation of participants is to attend and participate fully.

Please also note that participants seeking CME credits must attend all course sessions and complete each daily evaluation. No partial CME credits are offered.

If you have any questions about the course or information above, please don't hesitate to ask. The course coordinators can be reached at ClinicalCourses@Catalyst.harvard.edu.
